

Alibaba Cloud: Aliyun PowerPack Release Notes

Version 100

Table of Contents

Overview	1
Installation Process	1
Included Features	1
Known Issues	2

Overview

Version 100 of the Alibaba Cloud: Aliyun PowerPack adds the ability to monitor Aliyun configuration data and performance metrics, and includes multiple new Dynamic Applications.

- **Minimum Required Platform Version:** 8.2.0
- **Support Status:** Beta

This document describes:

- [The installation process for the PowerPack](#)
- [The features included in version 100](#)
- [The known issues that affect version 100](#)

Installation Process

To install version 100 of the Alibaba Cloud: Aliyun PowerPack, perform the following steps:

1. Familiarize yourself with the [Known Issues](#) for this release.
2. If you have not done so already, upgrade your system to the 8.2.0 or later release.
3. Download version 100 of the Alibaba Cloud: Aliyun PowerPack from the Customer Portal to a local computer.
4. Go to the **PowerPack Manager** page (System > Manage > PowerPacks). Click the Actions menu and choose *Import PowerPack*. When prompted, import version 100 of the Alibaba Cloud: Aliyun PowerPack.
5. After importing the PowerPack, you will be prompted to install the PowerPack. Click the Install button to install the PowerPack.

Included Features

The following features are included in version 100 of the Alibaba Cloud: Aliyun PowerPack:

- The following Dynamic Applications are included in the PowerPack:
 - Aliyun Account Configuration
 - Aliyun CloudDisk Configuration
 - Aliyun CloudDisk Instance Discovery
 - Aliyun CloudDisk Performance
 - Aliyun CloudDisk Service Discovery
 - Aliyun ECS Instance Configuration

- Aliyun ECS Instance Discovery
 - Aliyun ECS Instance Performance
 - Aliyun ECS Service Discovery
 - Aliyun Region Discovery
 - Aliyun Zone Discovery
- A SOAP/XML credential template is included in the PowerPack.
 - Icons were created for each of the Aliyun Region and Zone device classes, as well as the CloudDisk Instance, CloudDisk Service, ECS Instance, and ECS Service device classes.

Known Issues

The following are known issues that affect version 100 of the Alibaba Cloud: Aliyun PowerPack that will be addressed in a future release:

- The discovery process discovers all available Regions and Zones, even if they do not have resources deployed on them.
- The Aliyun Zone Discovery Dynamic Application renders the "Zone Name" in hex characters because of an issue displaying multibyte characters.
- There are occasional gaps in the ECS Instance and CloudDisk performance data.
- The collected ECS Instance performance data does not match perfectly with the ECS endpoint (AliyunCLI).
- An HTTP error message can display in the device log and system log for some Dynamic Applications.
