Cisco: ACI Multi-Site Manager PowerPack Release Notes

Version 102

Overview

Version 102 of the *Cisco: ACI Multi-Site Manager* PowerPack includes a new execution environment and updates to the credential and Dynamic Applications.

- **Minimum Required SL1 Version**: 11.2.0

Before You Install 2
Installing the PowerPack 2
Features 3
Enhancements and Issues Addressed 3
Known Issues 3

Before You Install

Ensure that you are running version 11.2.0 or later of SL1 before installing *Cisco: ACI Multi-Site Manager* version 102.

NOTE: For details on upgrading SL1, see the appropriate Release Notes.

Installing the PowerPack

TIP: By default, installing a new version of a PowerPack will overwrite all content in that PowerPack that has already been installed on the target system. You can use the ***Enable Selective PowerPack Field Protection*** setting in the **Behavior Settings** page (System > Settings > Behavior) to prevent the new version of the PowerPack from overwriting local changes for some commonly customized fields.

NOTE: If you are currently using the Dynamic Applications in this PowerPack to monitor devices, collection errors might occur for one or two polling cycles during the installation of a new version. To prevent collection errors during an upgrade, you can optionally disable collection for monitored devices before performing the following steps and re-enable collection after the upgrade.

To install version 102 of the *Cisco: ACI Multi-Site Manager* PowerPack, perform the following steps:

To install this PowerPack:

1. Familiarize yourself with the ***Known Issues*** for this release.
2. See the ***Before You Install or Upgrade*** section. If you have not done so already, upgrade your system to the 11.2.0 or later release.
3. Download the *Cisco: ACI Multi-Site Manager* version 102 PowerPack from the Support Site to a local computer.
4. Go to the **PowerPack Manager** page (System > Manage > PowerPacks). Click the **[Actions]** menu and choose *Import PowerPack*. When prompted, import *Cisco: ACI Multi-Site Manager* version 102.
5. Click the **[Install]** button. For details on installing PowerPacks, see the chapter on *Installing a PowerPack* in the ***PowerPacks*** manual.

Features

Version 102 of the *Cisco: ACI Multi-Site Manager* PowerPack includes the following features:

- Dynamic Applications that discover and collect data from ACI Multi-Site Manager devices
- Event Policies and corresponding alerts that are triggered when ACI Multi-Site Manager devices meet certain status criteria
- Device Classes for each type of ACI Multi-Site Manager device monitored
- A sample credential for discovering ACI Multi-Site Manager devices

Enhancements and Issues Addressed

The following enhancements and addressed issues are included in version 102 of the *Cisco: ACI Multi-Site Manager* PowerPack:

- The "Cisco: ACI Multi-Site Manager 2.0" execution environment was added to the PowerPack.
- The "Cisco: ACI Multi-Site Manager Component Counts" Dynamic Application was updated to use the same API call used by the "Cisco: ACI Multi-Site Manager Node Discovery" and "Cisco: ACI Multi-Site Manager Node Configuration" Dynamic Applications.
- An issue was addressed in which Dynamic Applications were not collecting any data due to a space in the "Content-type" credential header of the "Cisco: ACI MM Sample Credential".

Known Issues

Version 102 of the *Cisco: ACI Multi-Site Manager* PowerPack has no known issues.
