Overview

Version 104 of the Datacenter Advanced Enrichment Actions PowerPack updates the SSH/telnet connection framework to improve how connections are closed.

- **Minimum Required Platform Version:** 8.10.0
- **Support Status:** GA

This document describes:

- [Pre-installation information](#)
- [The installation process for the PowerPack](#)
- [The enhancements and issues addressed in version 104](#)

Before You Install

Ensure that you are running version 8.10.0 or later of SL1 before installing the *Datacenter Advanced Enrichment Actions* PowerPack version 104.

NOTE: For details on upgrading SL1, see the appropriate ScienceLogic [Release Notes](#).

Installation Process

To install version 104 of the *Datacenter Advanced Enrichment Actions* PowerPack:

1. See the [Before You Install](#) section. If you have not done so already, upgrade your system to the 8.10.0 or later release.
2. Download the *Datacenter Advanced Enrichment Actions* version 104 PowerPack to a local computer.
4. Go to the **PowerPack Manager** page (System > Manage > PowerPacks). Click the **[Actions]** menu and choose *Import PowerPack*. Import the *Datacenter Advanced Enrichment Actions* version 104 PowerPack. For details on importing PowerPacks, see the chapter on *Installing a PowerPack* in the **PowerPacks** manual.
5. Click the **[Install]** button. For details on installing PowerPacks, see the chapter on *Installing a PowerPack* in the **PowerPacks** manual.
6. See the *Datacenter Advanced Enrichment Actions PowerPacks* for instructions on using the PowerPack.

Features

The Datacenter Advanced Enrichment Actions PowerPack contains a set of automation actions that provide a framework for executing SSH and Telnet commands remotely on a variety of devices, and then formatting the result. There are 348 automation actions that build different lists of diagnostic commands to be executed by the framework. This PowerPack is a prerequisite installation for the Automation Policy PowerPacks or can be used to build custom Automation Policies.

Enhancements and Issues Addressed

The following issue has been addressed in version 104 of the *Datacenter Advanced Enrichment Actions* PowerPack:

- The framework that connects to devices using SSH and telnet has been updated to explicitly close the connection before the automation action completes.
