# Datacenter Automation Utilities PowerPack Release Notes

Version 105

---

## Overview

Version 105 of the "Datacenter Automation Utilities" PowerPack includes two new run book automation policies: "Automation Utilities: Integrate Automations with SNOW Scoped" and "Automation Utilities: Remove Automation Policies from PowerPack".

- **Minimum Required SL1 Version:** 11.3.0

This document covers the following topics:

<i>Before You Install or Upgrade</i> .....	2
<i>Installation and Upgrade Process</i> .....	3
<i>Enhancements and Issues Addressed</i> .....	3
<i>Known Issues</i> .....	4

---

## Before You Install or Upgrade

Ensure that you are running version 11.3.0 or later of SL1 before installing "Datacenter Automation Utilities" PowerPack version 105.

**NOTE:** For details on upgrading SL1, see the relevant [SL1 Platform Release Notes](#).

Also, "Datacenter Advanced Enrichment Actions" PowerPack version 108 must be installed on your SL1 system.

---

## Installation and Upgrade Process

**NOTE:** If you are currently using the Dynamic Applications in this PowerPack to monitor devices, collection errors might occur for one or two polling cycles during the installation of a new version. To prevent collection errors during an upgrade, you can optionally disable collection for monitored devices before performing the following steps and re-enable collection after the upgrade.

To install this PowerPack:

1. Search for and download the PowerPack from the **PowerPacks** page (Product Downloads > PowerPacks & SyncPacks) at the [ScienceLogic Support Site](#).
2. In SL1, go to the **PowerPacks** page (System > Manage > PowerPacks).
3. Click the **Actions** menu and choose *Import PowerPack*. The **Import PowerPack** modal appears.
4. Click **[Browse]** and navigate to the PowerPack file from step 1.
5. Select the PowerPack file and click **[Import]**. The **PowerPack Installer** modal displays a list of the PowerPack contents.
6. Click **[Install]**. The PowerPack is added to the **PowerPack Manager** page.

---

## Enhancements and Issues Addressed

The following enhancements and addressed issues are included in version 105 of the "Datacenter Automation Utilities" PowerPack:

- Added the "Automation Utilities: Integrate Automations with SNOW Scoped" run book automation policy. This policy updates the run book actions for a specified PowerPack so that PowerPack sends enrichment output to a ServiceNow integration.

Also added the following run book actions to support this automation policy:

- Automation Utilities: Change Enrichment Formatting to SN Scoped
- Automation Utilities: Connect Enrichment Automations to SN
- Added the "Automation Utilities: Remove Automation Policies from PowerPack" run book automation policy. The automation policy removes all automation policies from a specific Automation PowerPack. After you have customized an automation policy from an Automation PowerPack, you might want to remove that policy from that PowerPack to prevent your changes from being overwritten if you update the PowerPack later.

Also added the following run book action to support this automation policy: "Automation Utilities: Remove Automation Policies from PowerPack".

- Updated libraries in the Execution Environment for Python 3.6 compatibility.
- This PowerPack has been tested to work on SL1 systems running a Military Unique Deployment (MUD).

---

## Known Issues

This release has no known issues.
