Overview

Version 102 of the *Dell EMC: Isilon PowerPack* includes a known issue in the PowerPack's change log.

- **Minimum Required Platform Version:** 8.2.0
- **Support Status:** GA

This document describes:

- [Pre-installation or pre-upgrade information](#)
- [The installation and upgrade process for the PowerPack](#)
- [The features included in version 102](#)
- [The known issues that affect version 102](#)

Before You Install or Upgrade

Ensure that you are running version 8.2.0 or later of the ScienceLogic platform before installing the *Dell EMC: Isilon PowerPack* version 102.

NOTE: For details on upgrading the ScienceLogic platform, see the appropriate [ScienceLogic Release Notes](#).

Installing or Upgrading to Dell EMC: Isilon PowerPack version 102

To install the *Dell EMC: Isilon PowerPack* for the first time or to upgrade from a previous version, perform the following steps:

TIP: By default, installing a new version of a PowerPack will overwrite all content in that PowerPack that has already been installed on the target system. You can use the **Enable Selective PowerPack Field Protection** setting in the **Behavior Settings** page (System > Settings > Behavior) to prevent local changes for some commonly customized fields from being overwritten.

NOTE: If you are currently using the Dynamic Applications in the *Dell EMC: Isilon PowerPack* to monitor devices, collection errors might occur for one or two polling cycles during the installation of a new version. To prevent collection errors during an upgrade, you can optionally disable collection for monitored devices before performing the following steps and re-enable collection after the upgrade.

1. See the [Before You Install](#) section. If you have not done so already, upgrade your system to the 8.2.0 or later release.
2. Download version 102 of the *Dell EMC: Isilon* PowerPack from the Customer Portal to a local computer.
3. Go to the **PowerPack Manager** page (System > Manage > PowerPacks). Click the Actions menu and choose *Import PowerPack*. When prompted, import version 102 of the PowerPack.
4. After importing the PowerPack, you will be prompted to install the PowerPack. Click the **Install** button to install the PowerPack.

Features

Dell EMC: Isilon PowerPack version 102 includes the following features:

- Dynamic Applications to discover, model, and monitor performance metrics and collect configuration data for Dell EMC Isilon devices
- Device Classes for each type of Isilon device monitored
- Example credentials that you can use as templates to create a SOAP/XML credential for connecting to Isilon devices and an SNMP credential for device class alignment

NOTE: For discovery, you must create an SNMP credential and a SOAP/XML credential and then select both for the discovery session.

Known Issues

The following known issue affects version 102 of the *Dell EMC: Isilon*PowerPack:

- The change log on the PowerPack Properties page incorrectly states that the "Dell EMC: Isilon Event Monitoring" Dynamic Application was added to version 102 of the PowerPack. However, that Dynamic Application is actually planned for a future release.
