Before You Install or Upgrade

Ensure that you are running version 8.14.1 or later of SL1 before installing *Dell EMC: Isilon* version 103.

NOTE: For details on upgrading SL1, see the appropriate [Release Notes](#).

Installation or Upgrade Process

To install version 103 of the *Dell EMC: Isilon PowerPack*, perform the following steps:

TIP: By default, installing a new version of a PowerPack will overwrite all content in that PowerPack that has already been installed on the target system. You can use the **Enable Selective PowerPack Field Protection** setting in the **Behavior Settings** page (System > Settings > Behavior) to prevent the new version of the PowerPack from overwriting local changes for some commonly customized fields.

NOTE: If you are currently using the Dynamic Applications in this PowerPack to monitor devices, collection errors might occur for one or two polling cycles during the installation of a new version. To prevent collection errors during an upgrade, you can optionally disable collection for monitored devices before performing the following steps and re-enable collection after the upgrade.

1. Familiarize yourself with the [Known Issues](#) for this release.
2. See the [Before You Install or Upgrade](#) section. If you have not done so already, upgrade your system to the 8.14.1 or later release.

3. Search for and download the *Dell EMC: Isilon* PowerPack from the **PowerPacks** page on the [ScienceLogic Support Site](#).
4. In SL1, go to the **PowerPack Manager** page (System > Manage > PowerPacks).
5. Click the Actions button and choose *Import PowerPack*. The **Import PowerPack** modal appears.
6. Click Browse and navigate to the PowerPack file from step 3.
7. Select the PowerPack file and click Import. The **PowerPack Installer** modal page displays a list of the PowerPack contents.
8. Click Install. After the installation is complete, the PowerPack appears on the **PowerPack Manager** page.

Features

Version 103 of the *Dell EMC: Isilon* PowerPack includes the following features:

- Node discovery, reporting, and security enhancements.

NOTE: For discovery, you must create an SNMP credential and a SOAP/XML credential and then select both for the discovery session.

Enhancements and Issues Addressed

The following enhancements and addressed issues are included in version 103 of the *Dell EMC: Isilon* PowerPack:

- Addressed an issue in which node discovery reported all nodes regardless of physical node status.
- Addressed an issue in which duplicate component devices appear, when upgraded, due to the changing of unique node IDs. Customers must manually remove existing components and then upgrade the PowerPack, or they will need to upgrade the PowerPack and then, manually remove the old components.
- Introduced a security enhancement to the Dell EMC Isilon Node Hardware Configuration.

Known Issues

There are no known issues associated with this PowerPack.
