

Dell EMC Unity Automations PowerPack Release Notes

Version 101

Overview

Version 101 of the "Dell EMC Unity Automation" PowerPack includes updates for compatibility with Python 3. As a result, this version of the PowerPack runs only in a Python 3 execution environment.

- **Minimum Required SL1 Version:** 12.1.2

This document covers the following topics:

<i>Before You Install</i>	2
<i>Installing the PowerPack</i>	3
<i>Features</i>	3
<i>Known Issues</i>	3

Before You Install

Ensure that you are running version 12.1.2 or later of SL1 before installing this PowerPack.

NOTE: For details on upgrading SL1, see the relevant SL1 Platform Release Notes .
--

The following PowerPacks are prerequisites:

- "Datacenter Automation Utilities" version 202 or later
- "Dell EMC Unity" PowerPack version 103 or later

Installing the PowerPack

NOTE: If you are currently using the Dynamic Applications in this PowerPack to monitor devices, collection errors might occur for one or two polling cycles during the installation of a new version. To prevent collection errors during an upgrade, you can optionally disable collection for monitored devices before performing the following steps and re-enable collection after the upgrade.

To install this PowerPack:

1. Search for and download the PowerPack from the **PowerPacks** page on the [ScienceLogic Support Site](#) (Skylar One > PowerPacks).
2. In Skylar One (formerly SL1), go to the **PowerPacks** page (System > Manage > PowerPacks).
3. Click the **Actions** menu and choose *Import PowerPack*. The **Import PowerPack** modal appears.
4. Click **[Browse]** and navigate to the PowerPack file from step 1.
5. Select the PowerPack file and click **[Import]**. The **PowerPack Installer** modal displays a list of the PowerPack contents.
6. Click **[Install]**. The PowerPack is added to the **PowerPack Manager** page.

See the *Dell EMC Unity Automations PowerPack* manual for instructions on using the PowerPack.

Features

This release includes the following features:

- Updated the PowerPack to the latest libraries. As a result, this version of the PowerPack runs only in a Python 3 execution environment.
- Updated the run book actions in the PowerPack to Python 3.6. The run book automation policies were updated to the "Active Events/User Initiated" types. The "Datacenter Automation Utilities" PowerPack version 202 is now a prerequisite for this PowerPack, as the action types for the six run book actions come from that version.

Known Issues

This release has no known issues.
