# ELK Stack SyncPack

Release Notes Version 1.0.0

---

## Overview

Version 1.0.0 of the "ELK Stack" SyncPack describes how to use the PowerFlow platform to provide integration between SL1 devices and ELK devices.

This SyncPack uses the "ELK Stack Automation" PowerPack.

This document covers the following topics:

<a href="#">Features Included in this Release</a> .....	2
<a href="#">System Requirements</a> .....	3
<a href="#">Installing the SyncPack</a> .....	3

---

## Features Included in this Release

The following PowerFlow applications are included in this SyncPack:

- **Get Data from External Source.** This application acquires data from external sources to update ELK statuses in SL1.
- **Search Data in ELK.** This application searches data in ELK and posts updates to SL1.
- **Get Data from SL1.** This application acquires data from SL1 to send to ELK and back to SL1 for updates.

The following configuration object is included in the SyncPack:

- **ElasticSearch Logstash Kibana Configuration.** This configuration object can be used as a template after the SyncPack is installed on the PowerFlow system.

The following steps are included in this SyncPack:

- Get Log Data from SL1
- PostUpdateToSL1
- Get Search Result from ELK
- Send Data to ELK
- Update ELK Status To SL1

**TIP:** To view the latest manuals for the SL1 PowerFlow Platform, see the [SL1 PowerFlow](#) page. To view the latest release notes for PowerFlow, see [SL1 PowerFlow Release Notes](#).

---

## System Requirements

The "ELK Stack" SyncPack" version 1.0.0 requires:

- SL1 PowerFlow platform version: 2.4.0 or later
- SL1 version: 11.2.0 or later. For details on upgrading SL1, see the relevant [SL1 Platform Release Notes](#).
- "ELK Stack Automation" PowerPack version 100
- ELK Administrator access
- ScienceLogic Administrator access to the Administration Portal

The following table lists the port access required by the PowerFlow platform and this SyncPack:

Source IP	PowerFlow Destination	PowerFlow Source Port	Destination Port	Requirement
PowerFlow	SL1 API	Any	TCP 443	SL1 API Access
PowerFlow	ELK API	Any	TCP 443	ELK API Access

**NOTE:** ScienceLogic highly recommends that you disable all firewall session-limiting policies as the firewalls will drop HTTPS requests, resulting in data loss.

---

## Installing the SyncPack

A SyncPack file has the **.whl** file extension type. You can download the SyncPack file from the ScienceLogic Support site.

To locate and download the SyncPack:

1. Go to the ScienceLogic Support site at <https://support.sciencelogic.com/s/>.
2. Click the **[Product Downloads]** tab and select *PowerPacks*.
3. In the **Search PowerPacks** field, search for this SyncPack and select it from the search results. The **Release Version** page appears.
4. On the **[Files]** tab, click the down arrow next to the SyncPack version that you want to install, and select *Show File Details*. The **Release File Details** page appears.
5. Click the **[Download File]** button to download the .zip file containing the SyncPack.

After you download a SyncPack, you can import it to the PowerFlow platform using the PowerFlow user interface.

To import a SyncPack in the PowerFlow user interface:

1. On the **SyncPacks** page, click **[Import SyncPack]**. The **Import SyncPack** page appears.
2. Click **[Browse]** and select the **.whl** file for the SyncPack you want to install. You can also drag and drop a **.whl** file to the **Import SyncPack** page.
3. Click **[Import]**. PowerFlow registers and uploads the SyncPack. The SyncPack is added to the **SyncPacks** page.

**NOTE:** You cannot edit the content package in a SyncPack published by ScienceLogic. You must make a copy of a ScienceLogic SyncPack and save your changes to the new SyncPack to prevent overwriting any information in the original SyncPack when upgrading.

To activate and install a SyncPack in the PowerFlow user interface:

1. On the **SyncPacks** page, click the **[Actions]** button (⋮) for the SyncPack you want to install and select *Activate & Install*. The **Activate & Install SyncPack** modal appears.

**NOTE:** If you try to activate and install a SyncPack that is already activated and installed, you can choose to "force" installation across all the nodes in the PowerFlow system.

**TIP:** If you do not see the PowerPack that you want to install, click the Filter icon (≡) on the **SyncPacks** page and select *Toggle Inactive SyncPacks* to see a list of the imported PowerPacks.

2. Click **[Yes]** to confirm the activation and installation. When the SyncPack is activated, the **SyncPacks** page displays a green check mark icon for that SyncPack. If the activation or installation failed, then a red exclamation mark icon appears.
3. For more information about the activation and installation process, click the check mark icon or the exclamation mark icon in the **Activated** column for that SyncPack. For a successful installation, the "Activate & Install SyncPack" PowerFlow application appears, and you can view the Step Log for the steps. For a failed installation, the **Error Logs** window appears.
4. If you have other versions of the same SyncPack on your PowerFlow system, you can click the **[Actions]** button (⋮) for that SyncPack and select *Change active version* to activate a different version other than the version that is currently running.
