

Hitachi Data Systems: VSP PowerPack Release Notes

Version 104

Overview

Version 104 of the "Hitachi Data Systems: VSP" PowerPack includes updates for compatibility with Python 3.

- **Minimum Required SL1 Version:** 12.1.2

Before You Install or Upgrade	2
Installation or Upgrade Process	2
Features	3
Enhancements and Issues Addressed	3
Known Issues	3

Before You Install or Upgrade

Ensure that you are running version 12.1.2 or later of SL1 before installing the "Hitachi Data Systems: VSP" PowerPack.

NOTE: For details on upgrading SL1, see the relevant [SL1 Platform Release Notes](#).

Installation or Upgrade Process

To install version 104 of the "Hitachi Data Systems: VSP" PowerPack, perform the following steps:

TIP: By default, installing a new version of a PowerPack will overwrite all content in that PowerPack that has already been installed on the target system. You can use the **Enable Selective PowerPack Field Protection** setting in the **Behavior Settings** page (System > Settings > Behavior) to prevent the new version of the PowerPack from overwriting local changes for some commonly customized fields.

To install this PowerPack:

1. Familiarize yourself with the [Known Issues](#) for this release.
2. See the [Before You Install or Upgrade](#) section. If you have not done so already, upgrade your system to the 12.1.2 or later release.
3. Download the "Hitachi Data Systems: VSP" version 104 PowerPack from the Support Site to a local computer.
4. Go to the **PowerPack Manager** page (System > Manage > PowerPacks). Click the **[Actions]** menu and choose *Import PowerPack*. When prompted, import "Hitachi Data Systems: VSP" version 104.

5. Click the **[Install]** button. For details on installing PowerPacks, see the chapter on *Installing a PowerPack* in the **PowerPacks** manual.

Features

This release includes the following features:

- Dynamic Applications that discover and collect data from Hitachi VSP devices
- Event Policies that are triggered when VSP devices meet certain status criteria
- Device Classes for each type of VSP device monitored
- A sample credential for discovering VSP devices

Enhancements and Issues Addressed

The following enhancements and addressed issues are included in this release:

- All Dynamic Applications and their corresponding snippets are now compatible with Python 3, and the execution environment now runs on Python 3.

Known Issues

This release has no known issues.
