## Overview

Version 100 is the initial version of the *New Relic: APM* PowerPack.

- **Minimum Required Platform Version:** 8.8.0
- **Support Status:** Beta

This document describes:

- [Pre-installation information](#)
- [The installation process for the PowerPack](#)
- [The features included in version 100](#)

---

## Before You Install

Ensure that you are running 8.8.0 or later of SL1 before installing the *New Relic: APM* PowerPack version 100.

**NOTE:** Ensure that you do not have the *New Relic: APM Pro* PowerPack installed before installing the *New Relic: APM* PowerPack. These PowerPacks are not compatible. If you have the *New Relic: APM Pro* PowerPack installed, it will need to be uninstalled prior to installing the *New Relic: APM* PowerPack. The historical data from the *New Relic: APM Pro* PowerPack will be deleted when it is uninstalled.

**NOTE:** For details on upgrading the ScienceLogic platform, see the appropriate ScienceLogic [Release Notes](#).

---

## Installing New Relic: APM PowerPack version 100

To install the *New Relic: APM* PowerPack for the first time, perform the following steps:

1. See the [Before You Install](#) section. If you have not done so already, upgrade your system to the 8.8.0 or later release.
2. Download version 100 of the *New Relic: APM* PowerPack from the Customer Portal to a local computer.
3. Go to the **PowerPack Manager** page (System > Manage > PowerPacks). Click the **[Actions]** menu, and choose *Import PowerPack*. When prompted, import version 100 of the *New Relic: APM* PowerPack.
4. After importing the PowerPack, you will be prompted to install the PowerPack. Click the **[Install]** button to install the PowerPack.
5. See the manual *Monitoring New Relic* for instructions on using the PowerPack.

---

## Features

*New Relic: APM PowerPack* version 100 includes the following features:

- Dynamic Applications that discover and collect data from New Relic Application Performance Monitoring (APM) service and infrastructure services
- Event Policies and corresponding alerts that are triggered when New Relic services meet certain status criteria
- Device Classes and Device Categories for each type of New Relic service monitored
- A Sample Credential for discovering New Relic services
- Dashboards for viewing the status of your New Relic services

---

## Known Issues

The following are known issues that affect version 100 of the *New Relic: APM PowerPack*:

- The violations listed for the "New Relic: Events" Dynamic Application will not contain violations for devices that are not modeled by SL1 . Alerts for these devices will be displayed as log messages for the root device.
- There is a delay in Infrastructure Count reporting from the "New Relic: APM Discovery & Collection Cache" Dynamic Application, as it takes two to three collections cycles for the count to be collected, cached, read, and reported.
