# Restorepoint PowerPack

Release Notes Version 105

---

## Overview

Version 105 of the "Restorepoint" PowerPack adds a new Dynamic Application and event policies to the PowerPack.

This PowerPack works in conjunction with the "Restorepoint" SyncPack.

This document covers the following topics:

<a href="#">System Requirements</a> .....	2
<a href="#">Installing the PowerPack</a> .....	2
<a href="#">Included Features</a> .....	3
<a href="#">Known Issues</a> .....	3

---

## System Requirements

The "Restorepoint" PowerPack requires:

- SL1 PowerFlow platform version 2.5.0 or later.
- SL1 version 11.3.0 or later. For details on upgrading SL1, see the relevant [SL1 Platform Release Notes](#).
- Restorepoint version 5.5.x or later.

---

## Installing the PowerPack

**TIP:** By default, installing a new version of a PowerPack will overwrite all content in that PowerPack that has already been installed on the target system. You can use the **Enable Selective PowerPack Field Protection** setting in the **Behavior Settings** page (System > Settings > Behavior) in SL1 to prevent the new version of the PowerPack from overwriting local changes for some commonly customized fields.

**NOTE:** If you are currently using the Dynamic Applications in this PowerPack to monitor devices, collection errors might occur for one or two polling cycles during the installation of a new version. To prevent collection errors during an upgrade, you can optionally disable collection for monitored devices before performing the following steps and re-enable collection after the upgrade.

To install this PowerPack:

1. Search for and download the PowerPack from the **PowerPacks** page (Product Downloads > PowerPacks & SyncPacks) at the [ScienceLogic Support Site](#).
2. In SL1, go to the **PowerPacks** page (System > Manage > PowerPacks).
3. Click the **Actions** menu and choose *Import PowerPack*. The **Import PowerPack** modal appears.

4. Click **[Browse]** and navigate to the PowerPack file from step 1.
5. Select the PowerPack file and click **[Import]**. The **PowerPack Installer** modal displays a list of the PowerPack contents.
6. Click **[Install]**. The PowerPack is added to the **PowerPack Manager** page.

For more information about using the PowerPack, see the *Restorepoint SyncPack* manual.

---

## Included Features

This release includes the following features:

- Added the new "Compliance Alert" event policy to the PowerPack, which automatically creates an event from Restorepoint compliance alerts in SL1.
- Added the new "Restorepoint Second Password" Dynamic Application to the PowerPack, which allows you to align a second credential to a device.

---

## Known Issues

This release has no known issues.
