

Skylar Analytics Event Policies PowerPack Release Notes

Version 100

Overview

Version 100 of the "Skylar Analytics Event Policies" PowerPack collects the Skylar One (formerly SL1) event policies from the "Skylar - Predictive events" and "SL1: Skylar Anomaly Score Event Monitoring" PowerPacks.

This document covers the following topics:

| | |
|---|---|
| Before You Install or Upgrade | 2 |
| Installing the PowerPack | 3 |
| Features | 3 |
| Known Issues | 4 |

Before You Install or Upgrade

Ensure that you are running Skylar One version 12.3.2 or later before installing "Skylar Analytics Event Policies" PowerPack version 100. For details on upgrading Skylar One, see the relevant [Skylar One Release Notes](#).

Your Skylar One system should already be connected to Skylar Analytics. For details on connecting Skylar One with Skylar Analytics, see [Getting Started with Skylar Analytics](#).

The "Skylar Analytics Event Policies" PowerPack replaces the event policies in the following PowerPacks:

- Skylar Analytics
- Skylar - Predictive events
- SL1: Anomaly Score Event Monitoring
- SL1: Anomaly Index Event Monitoring

If you are still using event policies from those PowerPacks, ScienceLogic recommends that you complete the following steps to avoid disrupting existing events and Skylar AI links for predictive alerts:

1. In Skylar One, open each of the older PowerPacks on the **PowerPacks** page, go to the **Event Policies** tab, and click the remove or bomb icon (💣) for each event policy to remove the older policies.
2. Import and install the latest "Skylar Analytics Event Policies" PowerPack.
3. Edit the "Skylar Analytics Event Policies" PowerPack and click the lightning icon (⚡) next to all of the event policies that start with "anom" or "pred" are aligned to the new PowerPack.
4. Delete the older PowerPacks.

NOTE: Going forward, upgrades and installs will not require you to repeat these steps.

Installing the PowerPack

To install this PowerPack:

1. If you have not done so already, upgrade your Skylar One system to version 12.3.2 or later.
2. Download the "Skylar Analytics Event Policies" PowerPack from the Support Center at <https://support.sciencelogic.com/s/>.
3. Go to the **PowerPack Manager** page (System > Manage > PowerPacks). Click the **[Actions]** menu and choose *Import PowerPack*.
4. When prompted, import the PowerPack.
5. Click the **[Install]** button. For details on installing PowerPacks, see the chapter on *Installing a PowerPack* in the **PowerPacks** manual.

Features

Version 100 of this PowerPack collects the following Skylar One event policies from the "Skylar - Predictive events" and "SL1: Anomaly Score Event Monitoring" PowerPacks:

- Anomaly Score Critical - Skylar
- Anomaly Score Major- Skylar
- Anomaly Score Minor - Skylar
- Anomaly Score Notice - Skylar
- Predictive Alerting: Catch all Policy
- Predictive Alerting: Critical Event 0-7 Days
- Predictive Alerting: Major Event 8-14 Days
- Predictive Alerting: Minor Event 15-30 Days
- Predictive Alerting: Notice Event >30 Days
- Predictive Alerting: Critical Event P1
- Predictive Alerting: Major Event P2
- Predictive Alerting: Minor Event P3
- Predictive Alerting: Notice Event P4
- Predictive Alerting: Healthy Event P5

NOTE: The "Predictive Alerting: * Event P1-P4" policies are disabled by default. You can use these four policies in place of the "Predictive Alerting: * Event * Days" event policies. However, you should only enable one set of "Predictive Alerting" event policies that have a severity from Minor to Critical.

TIP: To view the Skylar Analytics documentation online, see the [Skylar Analytics Product Documentation](#).

Known Issues

This release has no known issues.
