Skylar Analytics Event Policies PowerPack Release Notes

Version 101

Overview

Version 101 of the "Skylar Analytics Event Policies" PowerPack adds a feature that enables Skylar One (formerly SL1) to automatically clear predictive alerts that are no longer valid.

This document covers the following topics:

Before You Install or Upgrade 2

Installing the PowerPack 3

Features 3

Known Issues 3

Before You Install or Upgrade

Ensure that you are running Skylar One version 12.3.2 or later before installing "Skylar Analytics Event Policies" PowerPack version 101. For details on upgrading Skylar One, see the relevant *Skylar One Release Notes*.

Your Skylar One system should already be connected to Skylar Analytics. For details on connecting Skylar One with Skylar Analytics, see *Getting Started with Skylar Analytics*.

The "Skylar Analytics Event Policies" PowerPack replaces the event policies in the following PowerPacks:

- Skylar Analytics
- Skylar - Predictive events
- SL1: Anomaly Score Event Monitoring
- SL1: Anomaly Index Event Monitoring

If you are still using event policies from those PowerPacks, ScienceLogic recommends that you complete the following steps to avoid disrupting existing events and Skylar AI links for predictive alerts:

1. In Skylar One, open each of the older PowerPacks on the **PowerPacks** page, go to the **Event Policies** tab, and click the remove or bomb icon ( ) for each event policy to remove the older policies.
2. Import and install the latest "Skylar Analytics Event Policies" PowerPack.
3. Edit the "Skylar Analytics Event Policies" PowerPack and click the lightning icon ( ) next to all of the event policies that start with "anom" or "pred" are aligned to the new PowerPack.
4. Delete the older PowerPacks.

NOTE: Going forward, upgrades and installs will not require you to repeat these steps.

Installing the PowerPack

To install this PowerPack:

1. If you have not done so already, upgrade your Skylar One system to version 12.3.2 or later.
2. Download the "Skylar Analytics Event Policies" PowerPack from the Support Center at https://support.sciencelogic.com/s/
3. Go to the **PowerPack Manager** page (System > Manage > PowerPacks). Click the **[Actions]** menu and choose *Import PowerPack*.
4. When prompted, import the PowerPack.
5. Click the **[Install]** button. For details on installing PowerPacks, see the chapter on *Installing a PowerPack* in the ***PowerPacks*** manual.

Features

The following feature was added to this release of the "Skylar Analytics Event Policies" PowerPack:

- Skylar One now automatically clears predictive alerts that are no longer valid. This features requires Skylar One version 12.3.2 or later and Skylar Analytics version 2.0 or later.

TIP: To view the Skylar Analytics documentation online, see the *Skylar Analytics Product Documentation*.

Known Issues

This release has no known issues.
