

Skylar Compliance PowerPack

Release Notes Version 107

Overview

Version 107 of the "Skylar Compliance" (formerly "Restorepoint") PowerPack rebrands the PowerPack to the "Skylar Compliance" PowerPack.

This PowerPack works in conjunction with the "Skylar Compliance" SyncPack.

This document covers the following topics:

System Requirements	2
Installing the PowerPack	2
Included Features	3
Known Issues	3

System Requirements

The "Skylar Compliance" PowerPack requires:

- Skylar Automation (formerly PowerFlow) platform version 3.0.0 or later.
- Skylar One (formerly SL1) version 12.3.x or later. For details on upgrading Skylar One, see the relevant [Skylar One Platform Release Notes](#).
- Skylar Compliance version 5.6.x or later.

Installing the PowerPack

TIP: By default, installing a new version of a PowerPack will overwrite all content in that PowerPack that has already been installed on the target system. You can use the **Enable Selective PowerPack Field Protection** setting in the **Behavior Settings** page (System > Settings > Behavior) in Skylar One to prevent the new version of the PowerPack from overwriting local changes for some commonly customized fields.

NOTE: If you are currently using the Dynamic Applications in this PowerPack to monitor devices, collection errors might occur for one or two polling cycles during the installation of a new version. To prevent collection errors during an upgrade, you can optionally disable collection for monitored devices before performing the following steps and re-enable collection after the upgrade.

To install this PowerPack:

1. Search for and download the PowerPack from the **PowerPacks** page on the [ScienceLogic Support Site](#) (Skylar One > PowerPacks).
2. In Skylar One (formerly SL1), go to the **PowerPacks** page (System > Manage > PowerPacks).
3. Click the **Actions** menu and choose *Import PowerPack*. The **Import PowerPack** modal appears.
4. Click **[Browse]** and navigate to the PowerPack file from step 1.
5. Select the PowerPack file and click **[Import]**. The **PowerPack Installer** modal displays a list of the PowerPack contents.
6. Click **[Install]**. The PowerPack is added to the **PowerPack Manager** page.

For more information about using the PowerPack, see the *Restorepoint SyncPack* manual.

Included Features

This release includes the following features:

- With this release, ScienceLogic has rebranded the "Restorepoint" PowerPack to the "Skylar Compliance" PowerPack. You will notice this rebranding throughout the PowerPack, along with the Skylar One (formerly SL1) platform. This change, as well as similar branding changes to the other products offered by ScienceLogic, reflects ScienceLogic's commitment to delivering intelligence that accelerates outcomes through service-centric observability, AI-driven operations, and intelligent automation. For more information, see the ScienceLogic website (<https://sciencelogic.com/platform/overview>).

Known Issues

This release has no known issues.
