Windows PowerShell Automations PowerPack

Release Notes, beta version 101

Table of Contents

Overview

Version 101 is the initial version of the *Windows PowerShell Automations* PowerPack. This PowerPack introduces five new automation policies and five new Run Book Actions, which you can use with the *Datacenter Advanced Enrichment Actions* PowerPack.

- **Minimum Required Platform Version**: 8.10.0
- **Support Status**: Beta

This document describes:

- *Pre-installation information*
- *The installation process for the PowerPack*
- *The features included in version 101*

Before You Install

Ensure that you are running version 8.10.0 or later of SL1 before installing the *Windows PowerShell Automations* PowerPack version 101.

> **IMPORTANT:** You must install the Datacenter Utilities PowerPack before using the *Windows PowerShell Automations PowerPack*.

> **NOTE**: For details on upgrading SL1, see the appropriate ScienceLogic Release Notes.

Installation Process

To install version 101 of the *Windows PowerShell Automations* PowerPack:

1. See the *Before You Install* section. If you have not done so already, upgrade your system to the 8.10.0 or later release.
2. Download the *Windows PowerShell Automations* version 101 PowerPack to a local computer.
4. Go to the **PowerPack Manager** page (System > Manage > PowerPacks). Click the **[Actions]** menu and choose *Import PowerPack*. Import the *Windows PowerShell Automations* version 101 PowerPack. For details on importing PowerPacks, see the chapter on *Installing a PowerPack* in the **PowerPacks** manual.
5. Click the **[Install]** button. For details on installing PowerPacks, see the chapter on *Installing a PowerPack* in the **PowerPacks** manual.
6. See the **Windows PowerShell Automations PowerPack** manual for instructions on using the new PowerPack.

Features

The following features are included in version 101 of the *Windows PowerShell Automations* PowerPack:
